DESIGN WITH NATURE'S PERFECT PATTERN

Whether we realize it or not, the shapes and patterns in nature have a great impact on architecture and interior design.

Consciously or unconsciously, we let ourselves be inspired and the hexagon - a pattern based on equilateral triangles - is just one of several basic geometric patterns emerged by forces of nature and basic mathematics. Just take a look at a beehive, snow crystals or the shape of certain flowers.

With Junckers HexParket we have recreated this pattern. Enjoy the aesthetics, the graphic look and the clean sharp lines expressed in this hardwood floor.

FACTS

- Junckers HexParket is manufactured in 100% solid hardwood oak.
- The tiles are hexagonal and assembled by 3 single-pieces.
- Each tile has a groove on all sides, enabling an accompanying loose tongue to be mounted in the installation phase.
- Installation is conducted by gluing the tiles to the subfloor.
- HexParket is delivered untreated from the factory and has to be "on site" surface treated with either lacquer or oil.
- The tiles have a thickness of 20,5mm and a width of 370 x 370 x 370mm.
- HexParket is delivered in Junckers highly demanded Harmony quality, i.e. with a natural appearance, few knots and some colour and structural graining variation between the individual tiles.
