# JOIN THE COLLAB WITH NATURE

## WHY JUNCKERS?

By choosing Junckers woodcare you receive not only a product perfectly suited for surface treatment and protection of wooden floors, you are also drawing upon the expertise we have gained from our manufacture of solid hardwood floors since the 1930's.

The production of Junckers lacquers began in the 1950's and continues today at our main manufacturing plant in Denmark.

Our range of lacquers and oils has always been developed by our own technical and research teams using the best and most up to date materials and technology.

**TOTAL SOLUTIONS,  
ALWAYS  
ACCOMPANIED BY  
PROFESSIONAL  
TECHNICAL SUPPORT**

Junckers woodcare range includes a fully integrated range of products for regular maintenance, refurbishment or surface treatment of brand new wooden floors. We provide a 100% solution regardless of project type.

We produce woodcare products specially developed for residential, commercial, sports and dance floors.

All our products are designed to help maintain a healthy indoor climate, be kind to the environment and complement timber as a raw material, giving you the full environmental and health benefits hardwood floors offer.

During the manufacture of Junckers woodcare we use stringent quality control throughout. Our policy to never compromise on the quality of materials means customers will always get the most durable and beautiful finish possible and contractors can be confident they will be giving their customers the best possible result.

Finally, with Junckers as a professional partner you are sure to receive the correct technical support before, during and after a project. Junckers professional technical team together with our trained sales staff are always ready to assist you and help to ensure the successful completion of your project.

# FILLING & PRIMING

Junckers filler and priming products form the basis for creating the most durable surface for a wooden floor. The products are always used in combination with a Junckers lacquer as part of our complete lacquer systems.

FILLING		SB FILLER	PRIMING	SB PRIMER
 <b>DESCRIPTION</b>		<p>A quick-drying solvent-based filler for filling gaps in the floor. Mixed with sanding dust from the sanded floor. It is used for filling gaps up to 2mm wide.</p> <p>SB Filler is used in combination with floor oil, solvent-based or water-based lacquers, and is suitable for most sanded and untreated parquet floors, including most exotic wood floors.</p>		<p>A solvent-based very fast curing primer. For wooden floors where water-based primers cannot be used due to poor adhesion, for example exotic and oily timbers.</p> <p>SB Primer gives the floor more depth of colour and must only be used directly on bare wood.</p>
 <b>APPEARANCE</b>		Colourless. When mixed with sanding dust it dries to the same colour as the wood.		Colourless when dry.
 <b>COVERAGE</b>		10 m <sup>2</sup> /litre.		10 m <sup>2</sup> /litre.
 <b>PACKAGE SIZE</b>		5 litres.		5 litres.
 <b>DRYING TIME*</b>		Approx. 15 minutes.		Approx. 30-60 minutes.
 <b>APPLICATION</b>		Broad full-edged stainless steel spatula.		Brush or short-pile roller.

\*at 20 °C and 50 % RH

PRIMING		WB PRIMER	CLEAR Pine	CLEAR Oak
 <b>DESCRIPTION</b>	<p>One-component water-based acrylic primer. Fast drying primer for use on untreated or machine sanded wooden floors in commercial, residential or sports areas.</p> <p>By using a primer the risk of side-bonding between the individual floor boards is minimised. Protective coats of one of Junckers water-based floor lacquers must be applied after priming.</p> <p>Choose WB Primer clear for the traditional look or WB Primer colour to create a lighter or darker atmosphere in the room. A coloured primer is slightly transparent and emphasises the natural grain structure of the wood.</p> <p>For tropical timbers, oily woods and dark coloured pattern floors e.g. herringbone, best results will be achieved by using our SB Primer.</p> <p>WB Primer Colour: A new way of colouring light timber floors like pine and oak. By adding colour to the primer you are able to both colour and prime at the same time and benefit from the same drying time as WB Primer clear.</p>			
 <b>APPEARANCE</b>	<p>Clear: Milky in the container. Dries to a colourless finish. Nordic: Milky in the container. Dries to an untreated look, when used on light wood species like pine, beech, ash and oak.</p> <p>White: Milky in the container. Dries to a transparent white finish.</p> <p>Driftwood grey: Dark grey in the container. Dries to a subtle grey 'wash' finish.</p> <p>Dark Coco: Dark brown in the container. Dries to a deep brown shade.</p>		NORDIC Pine	NORDIC Oak
 <b>COVERAGE</b>	8 m <sup>2</sup> /litre.		WHITE Pine	WHITE Oak
 <b>PACKAGE SIZE</b>	Clear: 2.5 litres, 5 litres and 10 litres. Dark Coco, Driftwood Grey, Nordic, White: 5 litres		DRIFTWOOD GREY Pine	DRIFTWOOD GREY Oak
 <b>DRYING TIME*</b>	Approx. 1-2 hours.		DARK COCO Pine	DARK COCO Oak
 <b>APPLICATION</b>	Microfibre roller.			

\*at 20 °C and 50 % RH

# FLOOR LACQUER

## FOR COMMERCIAL AND RESIDENTIAL USE

Junckers offers a wide range of floor lacquers which have been specifically developed for residential and commercial use. The choice of product depends on expected levels of foot traffic. Available in three different sheen levels, which makes it possible to obtain a finish that suits your individual interior space. When lacquering floors which have been sanded to bare wood, use one of Junckers primers prior to applying the top coats of lacquer. Using a primer will help prevent any gluing effect between floorboards and there are a number of colour options available.

## ADDED DURABILITY WITH TWO-COMPONENT LACQUERS

Junckers two-component lacquers are particularly well-suited for high traffic areas.

This range is the benchmark for just how durable water-based lacquers can be, and the fast drying time of the product makes it a perfect choice when time is all-important. Junckers range of two-component lacquers sets the standard in today's market, achieving the highest degree of wear resistance and superior levelling properties compared to other similar products on the market.

### LACQUERS FOR WOODEN FLOORS

## MAINTENANCE

### MAINTENANCE OIL

#### DESCRIPTION

A surface maintainer for use on floors which have been treated with Rustic Floor Oil, Eco 2K Eco Floor Oil or Hardwax Floor Oil.

The oil is easy to apply and the floor is ready for use after 30 to 60 minutes.

Protects the surface, restores a uniform sheen to the floor and reduces the effects of scratches and abrasions.

It is recommended to apply one coat of the oil, before starting to use a pre-finished oiled floor.

#### APPEARANCE

Clear: Dries to a colourless appearance.  
Black: Dries to a slightly transparent black appearance.

#### COVERAGE

30-50 m<sup>2</sup> per litre.

#### PACKAGE SIZE

Clear: 1, 2.5 and 10 litres.  
Black: 2.5 litres.

#### DRYING TIME\*

Ready for light traffic after 30-60 minutes.  
Fully cured after 24 hours.

#### APPLICATION

Flat microfibre mop or cotton cloth.

\*at 20 °C and 50 % RH
